

Laparoscopic Devices

Suction Irrigation

The LaproSurge Suction Irrigation range provides surgeons with multiple options to suit all needs for a range of laparoscopic procedures. The MD001 range is a modular system with a wide array of attachments to provide solutions to individual surgeon requirements.

Features and benefits

- Available with dual-spike irrigation for increased speed of bag changes or for use with dual pumps
- Screw thread connection for quick probe changes
- Rounded tip for atraumatic dissection
- Ergonomic handle is reversible for additional flexibility
- Distal lateral holes prevent inadvertent tissue separation
- Rigid shaft is matt for anti-glare
- Easy entry of monopolar electrode through rear trumpet valve adapter
- 3mm set available for use in paediatrics and compatible with accessories
- Non-modular MD002-5 economy set also available

Suction Irrigation

3mm also available

All devices feature an ergonomic traditional trumpet-grip handle to provide comfort for all hand sizes. The suction and irrigation flows are controlled by fingertip trumpet valve, which are colour coded for easy identification. The controls are lubricated to reduce friction and ensure

smooth and precise function control. The device has wide internal channels to provide a high capacity, streamlined flow throughout the entire system and prevent blockages from blood clots or stones. The highly durable tubing is manufactured from a non-kink material with easy peel separation.

Product	Type	Code	Diameter	Working Length	Quantity
Suction Irrigation	Set	MD001-3	3mm	330mm	10
Suction Irrigation	Set	MD001-5	5mm	330mm	10
Suction Irrigation (Long)	Set	MD001-45	5mm	450mm	10
Suction Irrigation (Economy)	Set	MD002-5	5mm	330mm	10
Probe Attachment	Attachment	HDP 002(S)	10mm	330mm	10
Probe Attachment (Long)	Attachment	HDP 004(S)	5mm	450mm	10
L-Hook Electrode Attachment	Attachment	HDP-HE(S)	5mm	330mm	10
Spatula Electrode Attachment	Attachment	HDP-SE(S)	5mm	330mm	10
